

# Exercise 1: Math Object

1. Open Notepad and type the following :

```
<!DOCTYPE html>
<head >
<script>

var ticket=12.58;
var totalCost;

document.write("a:" + ? + "<br><br>");

document.write("b:" + ? + "<br><br>");

document.write("c:" + ? + "<br><br>");

document.write("d:" + ? + "<br><br>");

document.write("e:" + ? + "<br><br>");

document.write("f:" + ? + "<br><br>");

document.write("g:" + ? + "<br><br>");

document.write("h:" + ? + "<br><br>");

document.write("i:" + ? + "<br><br>");

</script>
</head>
<body></body>
<html>
```

- 2.** Inside the document.write() replace the ? with the correct codes for the following letters :
- a. calculate the totalCost if the number of people buying the ticket is 6 – round the figure up
- b. find the highest number from the following:  
456, 200.92, 336, 120, 456.33
- c. find the lowest number from the following:  
-0.45, 0.567, 1.2, 0.067, -0.567
- d. find the square root of 144
- e. if  $2^2$  equals 4 then find the answer to  $4^3$
- f. round the figure 1289.567 down to the nearest integer
- g. round the figure 4569.567 to the nearest integer
- h. find the absolute value for  $|5.5|$
- i. find the exponent value for  $7^2$
- j. find the cosine for  $\cos(2)$
- k. find the tan for the angle  $60^\circ$
- 3.** Save file as math.html
