Exercise 3: Objects

1. Open Notepad and type the following :

```
<!DOCTYPE html>
<head>
<script>

function Student(name,id)
{
this.name=name;
this.id=id;
}
//new object goes here

Student.____?____.enrolement=function(){
return "You have enrolled on the course successfully"}

document.write("Name: " + ? +  "<br><br>")

document.write("ID: " + ? +  "<br><br>")

document.write("Enrolement:" +  ?  +  "<br><br>")

</script>

</head>
<body></body>
<html>
```

2. Create an object called called s1 with the following values:
name=sue   id=3456

3. Look at the enrolement () function and complete the ? with the missing word

4. Inside the document.write(?) type the code(s) to display the name, id and the enrolment method

5. Save the document as objectPrototype.html
